Education

York University

Bachelor of Engineering in Software Engineering, Specialized Honours

Toronto, Ontario

Sept. 2022 – Expected Dec. 2027

- Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Design, Databases, Software Testing, Operating Systems

Experience

Software Developer Co-op

CIBC- Canadian Imperial Bank of Commerce

Sept. 2024 – Dec. 2024

Toronto, Ontario

- Built a Java, SQL, and Jenkins automation pipeline for 8 weekly finance reports, cutting **15+ hours/week** of manual database querying for 20+ analysts and delivering outputs through Confluence in a regulated financial-services environment.
- Implemented name-change specifications across 3 legacy banking systems, improving identity-management and data-access workflows for frontline staff
- Reviewed customer-record schema changes affecting consent, permissions, and access-control logic for **4,000+ frontline staff**, debugging edge cases and writing release-risk notes ahead of 2 production deployments.
- Worked across the SDLC with business analysts, QA, and developers, turning stakeholder rules into implementation-ready specs, defect notes, and deployment checks.

Software Developer Co-op

Ontario Government

Sept. 2025 – Present

Toronto, Ontario

- Contributed to the migration of a 700K+ LOC legacy enterprise system into modern Angular and Spring Boot services, shipping 40+ reusable components across **3 ministry programs**.
- Diagnosed production defects by reverse-engineering legacy service calls, SQL dependencies, and UI state, then rebuilt the affected features as cleaner, API-backed workflows.
- Supported code quality across Java, Angular, and REST-style service changes through pull-request reviews, Jira ticketing, and regression testing.
- Converted business requirements into **15+ technical specifications**, helping 4 cross-functional teams align feature behavior, edge cases, and release-readiness checks.

Projects

TechYork Collaboration Platform | *Next.js, TypeScript, ASP.NET Core, PostgreSQL*

[Live Link](#)

- Built and led a 6-developer team shipping a full-stack collaboration platform for **100+ users** migrated hosting between different servers, cutting hosting costs by 80%.

REAI Real Estate Predictor | *Python, XGBoost, Optuna, Flask, Docker*

[Live Link](#)

- Trained and deployed an XGBoost model (Optuna-tuned, $R^2=0.91$) on **50K+ Canadian listings** behind a Dockerized Flask API with rate-limited, production-style endpoints.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C#, C++, Bash

Frontend: Angular, React, Next.js, HTML/CSS

Backend: Spring Boot, REST APIs, ASP.NET Core, Flask, MVC, OOP, SOLID

Databases: PostgreSQL, MySQL, MongoDB, Firestore

Cloud & DevOps: AWS (EC2, Lambda, S3), GCP, Azure, Docker, Git, Bitbucket, Jenkins, GitHub Actions

Testing & Collaboration: JUnit, Cypress, Playwright, Jira, Confluence, Agile/SDLC
