EDUCATION

York University

B.Eng. Software Engineering (Specialized Honours)

Toronto, ON

Sep. 2022 – Aug. 2027

EXPERIENCE

Software Developer Co-op

Ontario Government (MPBSD)

Sep. 2025 – Present

Toronto, ON

- Contributed to front-end modernization of a **700K+ LOC Java 1.8** legacy system to **Angular 21**, implementing **40+ reusable components** with a **Spring Boot facade** layer serving **3 ministry programs**.
- Pioneered a **code-as-design** workflow replacing Figma handoffs, generating production-ready Angular components directly from specs and reducing design-to-dev cycle time by **70% (50+ team hours/week saved)**.
- Built queryable knowledge bases using **Obsidian** and **Graphify** across **12 legacy modules**, producing structured specs that accelerated AI-assisted code generation by **3x**.
- Translated stakeholder requirements into **15+ technical specifications**, bridging business logic with implementation across **4 cross-functional teams**.

Software Developer Co-op

CIBC

Sep. 2024 – Dec. 2024

Toronto, ON

- Engineered a **Jenkins CI/CD pipeline** with **Java** to automate **8 weekly Excel reports**, eliminating **15+ hours/week** of manual DB queries for **20+ analysts** via Confluence delivery.
- Implemented **name-change specifications** across **3 legacy banking systems**, improving identity management for **11M+ retail clients**.
- Analyzed **eCIF client database** schema changes impacting **consent and permissions** for **4,000+ frontline staff**, delivering risk assessments for **2 production releases**.

LEADERSHIP

Developer / Automation Lead (Volunteer)

Data Science Club @ York University

Oct. 2025 – Present

Toronto, ON

- Architected and shipped a **Next.js** platform with **Firestore**, and **Zod**-validated APIs, serving **80+ active members** across event registration, admin, and CMS workflows.
- Delivered **4 cloud AI workshops** and built **3 internal automation tools**, reducing manual club operations by **60%**.

PROJECTS

TechYork – University Collaboration Platform | [Next.js](#), [TypeScript](#), [C#](#), [ASP.NET Core](#), [Neon DB](#) | [Live](#) Ongoing

- Architected a full-stack platform with **Next.js** frontend and **C# / ASP.NET Core** backend, managing **30+ active users** with MVC-structured API layer.
- Led a team of **6 developers** – managed GitHub issues, CI/CD pipelines, code reviews, and deployments across **dev/prod environments**.
- Migrated infrastructure from **Railway** to a **self-hosted VPS**, cutting hosting costs by **80%** while improving latency by **40%**.
- Built **GitHub API ingestion**, custom job scrapers, and logic-gate code trees processing **500+ data points daily**.

Hermes Agent Deployment | [Codex](#), [Nous Research](#), [Linux VPS](#), [Automation](#)

[GitHub](#)

- Deployed **Hermes** (Nous Research) on a **Linux VPS** with **Codex**, configuring it as a specialized coding agent handling **20+ automated tasks/day** including **Grocery orders**, **financial planning**, **project analytics**
- Integrated **MCP protocol** for direct database interaction, **cron-scheduled automations**, and context-aware code assistance.

REAI – Real Estate Price Predictor | [Python](#), [XGBoost](#), [Flask](#), [Docker](#)

[Live Demo](#)

- Built an **XGBoost** model fine-tuned with **Optuna** ($R^2 = 0.91$) to predict Canadian home prices across **50K+ listings**.
- Containerized with **Docker**, deployed on Railway with **rate-limited endpoints (100 req/min)** and **Imagen API** integration for property visualization.

TECHNICAL SKILLS

Languages: TypeScript, Python, Java, C#, SQL, HTML/CSS

Frameworks: Angular, React, Next.js, Spring Boot, ASP.NET Core, Flask

Cloud / DevOps: GCP (Cloud Run, Pub/Sub, BigQuery), Azure, Firebase, AWS (EC2, Lambda, S3, App Runner), Docker

Tools: Jenkins, Git, Cypress, Playwright, JUnit, Confluence, Jira

AI & Knowledge Engineering: Obsidian, Graphify, OpenRouter API, Codex, Claude Code, MCP
